

Vent-Lite Window

A BREATH OF FRESH AIR

Vent-Lite Window

Get a breath of fresh air with AJ's new Vent-Lite Window option.

With the addition of the Vent-Lite Window to your AJ door, you can enjoy the warm breezes of summer and still shut-out cold winds and rain. AJ doors with Vent-Lite Windows are a great addition to:

- garages
- lake cabins
- milking parlors
- barns
- workshops
- buildings requiring additional ventilation

Designed for energy efficiency, each Vent-Lite Window uses 3/4" insulated tempered glass and is double sealed to resist air and water infiltration. The maintenance-free frame is weather and UV resistant with an enduring finish that never needs painting. Interlocking rails between the operating and fixed sash ensure a tight and secure fit.

So, when you purchase an AJ door, remember the Vent-Lite Window option, and get a breath of fresh air through your entrance.

Pictured here in the 5100 door series, the Vent-Lite Window is the ideal way to ventilate your structure.

- Ergonomic latches adjust to 10 different heights allowing you to control the level of air flow
- Easily removable screen for simplified cleaning
- Maintenance-free frame
- 3/4" insulated tempered glass for thermal protection during cooler months
- Removable sash for easy cleaning
- Interlocking rails between operating and fixed sash
- Window size is 22"x36"

Vent-Lite Windows are available in white only.
