Conflict Minerals Statement
01/01/2021

To whom it may concern;

The base metals used to manufacture our products are aluminum (alloys 3003, 3105, 5052, and 6063), galvanized steel, and types 304 and 316 stainless steel. None of the “conflict minerals” defined by the SEC rules promulgated in response to the Dodd-Frank Wall Street Reform and Consumer Protection Act are intentionally added to these metals, and none of the identified conflict minerals are necessary to the functionality of these products. Additionally, none of the identified conflict minerals are necessary to the functionality of the peripheral componentry of our manufactured products and none are intentionally added.
