Supply Chain Management Policy for Sustainability, 2023 (incorporated as a component of the AJ Procurement Policy Manual)

- A. It is AJ Manufacturing's intent to responsibly employ social, environmental, and economic practices which support overall Sustainability efforts. Sustainability shall include:
 - 1) Environmental sustainability, including compliance with all local, state, and federal regulations as well as international regulations when applicable;
 - 2) Enterprise sustainability, including planning and provisions for business continuity in the event of unanticipated Supply Chain disruptions regardless of the source(s) of the disruptions.

- B. AJ's Policy will include a written survey of our Suppliers to ensure that they follow all applicable laws and regulations and generally support sustainability efforts in the areas of social, environmental, and economic practices as outlined above. This written survey shall take place no less than once every 5 years. There may also be on site audits conducted when deemed appropriate.
